

# Semantic Web: Exercises for 25 May

An De Rijdt

## Description

Below a small part of Crossfit is described in RDF. Crossfit is a sport which combines elements from gymnastics, weightlifting and cardio.

## Graph

## Turtle

Because not all the resources existed in the laundromat, we used other urls where the objects were referenced.

@prefix dbp: <http://dbpedia.org/property/> .

 :exercise cf:Clean\_%26\_Jerk .  
 cf:The\_Girls dbp:subtype cf:CrossFit\_Named\_WODs .  
 cf:CrossFit\_Named\_Wods dbp:name "Benchmark WODs".

## Graph from visualizer

The graph looks a bit different because of the RDF above:

- The use of literals for instance for the athlete's name.
- It seems items are repeated. I do not know if this is for the sake of readability of the graph or necessary.
